Description

Product Details

FROG Mineral System

- Fresh Mineral Water System for all Above Ground Pools up to 25,000 gallons
- Mineral Water System will not cause corrosion to pool parts
- Salt system pools cause corrosion of metal parts including the pool frame
- Chlorine that lasts 2x longer with FROG Leap Mineral System+ that destroys bacteria
- Lower chlorine levels help prevent damage to equipment and surfaces
- Less problems like faded swimsuits or smelly odors.
- Mineral Infuzer Cyclizers have a 10 year warranty. Many above ground manufacturers void their warranty if a salt chlorine generator is used.
- Anti-Bac Mineral Pac will last the full season or up to 6 months
- The complete Pool Frog cyclizer allows you to cut chlorine use by up to 50%.
- No extra plumbing. No electricity. No extra headaches!

Expert's Advice

The Above Ground Pool Professional's Advice

The easiest way to explain a FROG Mineral System is like this: Have you ever had a fish tank? You can't put chlorine in the tank to clean the water, you will kill your fish. So what do you do? You use a mineral cartridge. As the water flows through the mineral cartridge, the nature effects of the minerals on the water is to kill the bacteria.

This is exactly the same idea as a FROG. As the pool's water flows through the cartridge, the bacteria is killed and the water is left clean. However, seeing as though the pool is not in as controlled of an environment as a fish tank, chlorine is still needed to keep the sanitizer level proper, but the chlorine use is cut in half. This saves you money and keeps the water cleaner with less chlorine in the water. WIN/WIN!
